

# fyohannes\_replication

Feven Yohannes

April 12, 2020

## Abstract:

This project conducts a replication of Nicholas Kuipers' paper "The Effect of Electing Female Candidates on Attitudes Towards Intimate Partner Violence", and also includes an extension. In this extension, I replicate Kuipers' models by using the Bayesian model. Through this extension, I am testing if the results are statistically significant when a different method is used.

## Introduction:
